

# PUBLIC MEETING NOTICE

COPPER VALLEY DEVELOPMENT ASSOCIATION

## Highway Right-of-Way Survey Update

**Property owners and community members are invited** to an informational meeting hosted by the **Copper Valley Development Association (CVDA) and the Alaska Department of Transportation & Public Facilities (DOT&PF)**. They will present findings from a recent survey and cataloging of Right-of-Way (ROW) encroachments along portions of the Glenn and Richardson Highways in Glennallen.

### BACKGROUND

The Glenn Highway was established in 1942 with a 200-foot width. In 1958, Public Land Order 1613 expanded that width to 300 feet, but a series of Public Land Orders issued between 1942 and 1965 delayed the effective date of that expansion in certain areas. As a result, some structures and improvements were built in good faith in what owners believed was private land, but which fell within the outer 50 feet of the expanded highway ROW. Portions of the Richardson Highway corridor are similarly affected. CVDA is working with DOT&PF to help affected landowners understand their options, including applications to **vacate excess ROW, obtain encroachment permits**, or otherwise resolve outstanding issues.

### ARE YOU AFFECTED?

If your property lies adjacent to the Glenn Hwy from Glenn-Richardson Highway intersection westward approximately 7 miles, or along the Richardson Hwy from Glennallen northward to approximately the Gulkana Airport access road, this meeting may directly affect you.

### MEETING DATE & TIME

## Wednesday, June 24, 2026

*Glennallen Community Center  
(formerly the Murdock Center)*

### TIME

**4:00 – 5:00 PM**

**5:00 – 7:00 PM**

### ACTIVITY

Informational Presentation: Survey Findings & Landowner options

Open Q & A and Application Preparation Assistance

**Staff will be on hand to assist affected landowners in beginning preparation of their applications.**

*Landowners are encouraged to bring any available property documents, surveys, and deed information to the 5-7 PM session.*

**907-822-3071**
